

Martin Mensch

Cargo Surveyor and Warehouse risk assessment
Expert at Battermann & Tillery Group

Martin Mensch graduated from the City University of Applied Sciences in Bremen, Germany with a bachelor's degree in maritime economy and management.

Prior to this, he had worked as a hydraulic engineer for the German Federal Waterway Administration in maintenance of large industrial buildings such as locks and flood barriers.

After a few short stints in different fields of the maritime economy (port agent, supercargo, working on board a cruise ship) Martin joined the Battermann & Tillery Group as a cargo surveyor and loss prevention specialist, initially primarily responsible for international claims at the head office in Bremen. Later, he also worked as a cargo surveyor in Vienna, Austria as well as in Freiburg, Germany.

During his time with Battermann & Tillery, Martin became more and more interested in the field of warehouse exposure inspections. He has inspected numerous warehouses, production sites and entire port facilities and has prepared more than 100 extensive risk reports.
